

KUDUGUNTA PRANAYREDDY

Hyderabad, Telangana | pranay2095@gmail.com | +91 9398100819

PROFESSIONAL SUMMARY

B.Tech Computer Science and Information Technology student with skills in Python, SQL, frontend development, machine learning, and computer vision. Built academic projects involving cloud-type classification and a RAG-powered academic assistance system. Seeking an entry-level IT role to apply technical and problem-solving skills while continuing professional growth.

EDUCATION

Sree Dattha Institute of Engineering and Science, Hyderabad - B.Tech, CSIT (CGPA: 7.29)	2023 - 2027
Sri Chaitanya Junior Kalashala, Hyderabad, Telangana - Intermediate / Class XII (82.7%)	2021 - 2023
Sri Chaitanya School, Serilingampally, Telangana - SSC / Class X (GPA: 10.0)	2020

TECHNICAL SKILLS

Programming: Python

Frontend Development: HTML, CSS, React.js, TypeScript, React Hooks, Tailwind CSS

Databases & APIs: SQL, Vector Database, RESTful APIs, JWT Authentication

Libraries & Tools: OpenCV, NumPy, Pandas, Matplotlib, Scikit-learn, VS Code, Git

Professional Skills: Communication, Teamwork, Problem Solving, Adaptability

PROJECTS

Machine Learning-Based Cloud Type Classification from Sky Images for Weather and Climate Monitoring

Python, Pandas, NumPy, Matplotlib, Scikit-learn, KNN, Gaussian Naive Bayes, Extra Trees, Decision Trees

- Built Sky Vision Cloud, an end-to-end machine learning system for automated cloud identification from sky images.
- Created a preprocessing pipeline with resizing, flattening, encoding, exploratory data analysis, and data augmentation.
- Applied SMOTE and compared Logistic Regression, Gaussian Naive Bayes, Decision Tree, Random Forest, KNN, and Extra Trees classifiers.
- Delivered accurate cloud-type predictions to support weather and climate monitoring.

RAG-Powered Academic Assistance System

React.js, TypeScript, React Hooks, Tailwind CSS, JWT, RESTful APIs, Vector Database

- Built a responsive React.js frontend that lets students upload and query large files with AI-driven, context-aware summaries.
- Implemented state management with React Hooks for real-time chat, file interactions, and AI response rendering.
- Integrated RESTful APIs with JWT authentication for secure data flow, login, signup, and Spring Boot backend communication.

CERTIFICATIONS

- Python - OneRoadmap - SQL - OneRoadmap

ACHIEVEMENTS & ACTIVITIES

- Practiced Python programming and problem-solving through coding exercises.
- Developed academic projects using Python and computer vision technologies.
